

RIO

Birds

Vibrant. Bright. Colourful.

How do you imagine a parrot? Vibrant, bright, colourful... This is what the brand RIO brand is all about. Our mission is to bring joy to the house of the cheerful feathered pets and their owners. This is why we select the best grains and seeds, fruit, nuts, vegetables, rare fruits, and many other ingredients all over the world and produce only products of the highest quality. We are also convinced that the most important factor in a pet's healthy and active life is the care and attention of its owner. This is why the brand's wide range includes both various feeds and specialized diets and original treats, vitamins, and supplements. Besides, the RIO range also includes products you can feed to wild birds in the streets or in a park, as they are also in need of our care.

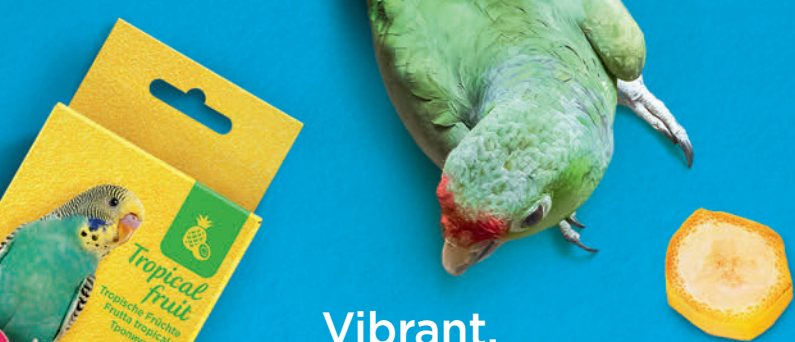

The brand's products stand out through their acclaimed high quality and the bright packaging is easy to spot on a shelf. Bird owners and breeders appreciate the reliability of the RIO brand, which is confirmed by the steadily growing demand. We don't rest on our laurels and keep expanding and updating our range in order to make every bird's domestic life as happy as possible and to make sure that owners only get joy and the most positive vibes from engaging with their pets.

Here, there
& everywhere!

Feed and Complementary feed

RIO feed range includes feeds for balanced daily diet for various bird species, feeds for the moulting period, complementary feeds — essential supplement during periods of growth, moulting, and breeding, as well as hand feeding food for baby birds.

-  Carefully selected ingredients
-  Strong beak and bones — Calcium granules
-  Healthy feathers — Omega 3 & 6
-  Immunity protection — Algae

Daily feed for budgies with balanced composition includes black millet as a great source of energy, nutritious Niger seeds, linseed, and other wholesome grains.

Moulting period feed for budgies has an increased fat and protein content for a quick and painless regeneration of the plumage. Contains sesame and Niger seeds.

Daily feed for parakeets with an extra varied composition contains rowanberries and carrots to maintain healthy eyesight and skin. Enriched with calcium.

Moulting period feed for parakeets provides a special support during this stressful period. 19 ingredients ensure a varied and balanced diet.

Daily feed for conures and quakers offers a variety of tropical fruits, vegetables, nuts, and berries, which covers all nutritional needs of these lively birds.

Daily feed for parrots offers a rich composition of fruits, vegetables, nuts, puffed seeds, and berries, as well as chilli — a special treat that helps detox the body.

Daily feed for canaries is rich in specially selected grains and seeds that suit the small beaks of songbirds perfectly. The feed contains canary seed, millet, rapeseed, Niger seeds, and linseed.

Moulting period feed for canaries has a high fat and protein content for a quick and painless plumage regeneration. Added linseed and algae serve to support the immune system.

Daily feed for exotic birds consists of 15 healthy ingredients, including Niger seeds, linseed, as well as black millet and sesame seeds to maintain strength and energy.

Daily feed for wild birds with balanced composition includes thistle, flax, Niger seeds, as well as perilla, which essential oils help detox the body.

Hand feeding food for baby birds is a completely nutrient-dense food, specially formulated to meet the energy requirements of birds from hatching through to weaning.

Complementary feed

In order to stay healthy, the birds' diet needs to be completed with a whole range of nutrients, including proteins, amino acids, vitamins, and minerals. To provide this variety, it is important to offer extra supplements alongside the main feed.

Perfect condition

Energy & vitality

Immunity protection

Healthy feathers

Eggfood for budgies and small birds is made from whole eggs with the addition of honey, vitamins, and minerals. A combination of biotin and amino acids ensures a healthy plumage and supports the birds during moulting and breeding periods.

The multi-coloured extruded bits of the **RIO Eggfood for parakeets, and parrots** are ovenbaked and have a crunchy texture which parakeets and parrots love a lot. Chilli, spirulina, and turmeric root are used for natural colouring.

Gourmet food for budgies and small birds is a nutritious source of easily digestible proteins, healthy fats, and fatty acids contained in eggs and dry insects. The fruits and berries make the pets' diet more varied, whilst yeast extract supports the immune system.

Gourmet food for parakeets and parrots contains large and crunchy extruded bits, fruits, berries, vegetables, and nuts, which ensure the variety in the diet. Egg white helps keep the bird's body in top shape, whilst vitamins and minerals provide an extra boost of energy.

100% natural ingredients

Germination set is the best and easiest way to germinate grains and seeds at home. In comparison with a regular seed mixture, germinated seeds are full of enzymes, vitamins, and minerals.

Snacks

The RIO snack range contains 19 different products developed to meet the nutritional needs and preferences of parrots, canaries, budgies, and other bird species. Snacks will help owners express their love to pet birds, encourage them for playing and training and bring variety to their diet.

Biscuits

RIO biscuits are a tasty and nutritious supplement to diversify the main diet of all bird species. Made from eggs and cereals, this oven-baked crispy treat will help bird owners express their love to their pets.

 Oven-baked

 Source of energy

 Crunchy texture

 5 pieces

Biscuits with wild berries include wild berries such as blueberries, blackberries, raspberries, and strawberries, which will bring variety to the pet birds' diet.

Biscuits with healthy seeds are a healthy snack, that contains rare seeds of cultivated plants such as clover, carrot, spinach, and chicory.

Natural treats

Nature itself has inspired us to create our natural treats, which your pets would be able to come across in their natural habitat. The main purpose of each treat is to encourage natural behaviours in birds, to make their leisure more exciting and to bring some fun into their lives.

Healthy seeds mix includes a variety of garden seeds, vegetables, and field crops that greatly enrich the daily diet and maintain the birds' well-being.

Wild seeds mix contains a variety of seeds that are the nutritional basis of birds in the wild. The blend consists of 16 healthy ingredients that maintain the pets' energy.

Treat-toys

The RIO treat-toys stimulate natural behaviour and provide an interactive feeding experience for active and lively pet birds. The delicious activity treats include a variety of seeds and grains, fruits, and other beneficial ingredients.

Happy ring for budgies and exotic birds is a swing shaped, yummy treat-toy which helps encourage natural behaviour and keeps pet birds busy for a long time.

Happy ring for parakeets is an amusing treat-toy developed to stimulate natural behaviour and the foraging instinct of these lively pet birds. This delicious activity treat will help enrich the pets' diet.

Songbird mix contains carefully selected ingredients which songbirds enjoy in the wild. This treat is rich in vegetable proteins and serves as a source of energy that encourages pet birds to sing.

Fruit & Nuts mix includes naturally dried fruits, crunchy nuts, berries, and seeds. This yummy treat is an excellent source of additional energy and brings variety to the birds' daily diet.

Niger seeds are a favorite treat of budgies, cockatiels, lovebirds, and all types of weavers. The seeds are rich in nutrients, proteins, and fats, and especially recommended during seasonal moulting.

Sesame seeds are extra high in calcium, which is needed for a strong beak and bones, as well as to support the health of the birds' musculo-skeletal system.

Spray millet is a favourite treat and toy for all kinds of birds. Like wild birds in nature, caged birds get great pleasure out of plucking the fresh grains from the panicles.

Cedar cone is an excellent treat and toy for parrots. The pine nuts are rich in antioxidants, vitamins, and minerals. A special drying technology ensures a reduced resin content. The treat comes with a handy chain and clasp.

Wild bird feeding

Feeding birds in the wild means helping them during hard times by offering additional nutrition when food in their natural habitat is lacking. Feeding wild birds is a part of wildlife care and supports biodiversity.

Fat balls are made from animal fats, seeds, and nuts, and are suitable for feeding wild birds all year round. The fat ball is in a net, which can be easily placed on tree branches or the balcony.

Peanuts are rich in proteins and fat. The net is easy to fasten on the tree branches or the balcony.

Sunflower seeds are a beneficial natural treat for birds. Rich in protein and fat, sunflower seeds are a great source of nutrition. They are an excellent filling for feeders.

Vitamins and Supplements

A daily consumption of vitamins and minerals is very important to keep pet birds healthy and active. Special supplements can enrich the pets' diet and have a positive impact on the digestive system.

 Strong beak and bones

 Energy all year round

 Immunity protection

 Natural source of minerals

 Healthy feathers

Grit mixture for digestion is a multicomponent mix of organic and inorganic particles, which grind the food in the birds' stomach and serve as a source of minerals.

Mineral stick is a new convenient way to offer pet birds vital minerals, which help maintain healthy bones and beaks and support the water-salt balance.

Sepia shell is a natural source of calcium and other essential minerals. The medium-sized Sepia shell is perfect for budgies, parakeets, and small birds.

Sepia shell or cuttlefish bone is an essential source of calcium. The XL-sized Sepia shell is perfect for parakeets, parrots, and for several birds sharing a cage.

Vitamin and mineral pellets for budgies and parakeets include a special complex of essential vitamins, macro- and micronutrients for the birds' ultimate nutrition and health.

Vitamin and mineral pellets for canaries, exotic birds, and other small birds enrich the birds' diet and eliminate adverse effects of an unbalanced nutrition.

Bird sand. Sterilized at temperatures above 1.200°C, the RIO bird sand with eucalyptus extract is perfect to maintain a clean and fresh cage. The added pieces of oyster shells serve as a source of calcium and other minerals.

Care products

A natural product for cleanliness and freshness in the bird cages.
